APARTMENT INFORMATION

Smoking: No smoking of any type is allowed in the apartment or building.

Internet: Access to the internet is available through WiFi and wired Ethernet connection (for the WiFi password, please contact your property manager). An emergency, landline telephone is located inside the TV cabinet and is free to local landlines (long distance and calls to mobile phones is blocked).

Remote Controls: The remotes controls are either on the top of the TV cabinet or inside its right top drawer.

Toilet: Do not throw papers or other objects in the toilet. The system is not designed to handle paper as in may be in other countries. Guests will be held responsible for damages.

Air-Condition: Please turn-off the Air-Condition whenever you leave the property.

Security: Please ensure that the doors are locked at all times and don't allow anyone to follow you in the building when entering or exiting. For your protection, there are security cameras in the common areas of the building.

Garbage: If you have garbage between clean ups, or just don't like odors, you may take them to the bins at end of the road (as you exit, turn to the right).

Noise ordinance (Quiet Hours): <https://www.astynomia.gr/odigos-tou-politi/chrisimes-symvoules/diafores/poies-einai-oi-ores-koinis-isychias>

Cooking: Although, there is a refrigerator and a microwave to warm up food, the apartment is not intended or designed for large household cooking.

Folding Sofabed: If you lift up the bed to use the sofa, first pick up all the bedding, blankets, and pillows and set them aside, otherwise they will fall in the back. And be very careful as it is very heavy and you may be injured.

Folding Desk - Folding Table: Be extra careful when retracting these fixtures because they are fragile. Ensure that they are secure to use and be gentle with them. Fold away when not in use.

Ambient light: The left switch on the left of the window controls the mini spotlight ambient light. This light may be controlled via Bluetooth using the SmartLife app.

Kitchen and Bathroom windows: These two windows lead to the lightwell which may have odors beyond our control. We do not recommend that you open them unless absolutely necessary.

Hot Water: The water is balanced by thermostatic valve at a temperature which is hot but will not scald. The hot water is heated by solar/electric boiler. If there is no hot water (for example on a cloudy day), you may need to activate the electric circuit. Instructions are located on the electrical panel (to your right upon entering).

Brown-outs and flickering lights are not uncommon in the dense area of the apartment during the hot summer months when the power grid is overloaded.

Others: There are extra chairs (or other things) that you may need to use in the boiler room. Some of these are shared but available for everyone to use. Please be aware that we do not control the boiler room and it is not expected to be in a good, clean condition as the apartment.

Property Manager (Host): For every concern, question, or advice, feel free to contact your property manager. This may be the most important number you may need during your stay.

Enjoy your stay!
